

Why ActivePassive?

The ActivePassive Funds are invested in what we believe is an optimal combination of active and passive investments, seeking to gain the benefits of both strategies and minimizing the challenges of each. We believe this blend allows for a best of both worlds product: the potential for higher returns with active management in categories that have historically outperformed their benchmarks and the lower cost advantages of passive management in categories where actively managed strategies have not historically beat their benchmarks.

These funds provide a unity of opposites— a blend of two opposing but complimentary investment approaches.

Current Optimal Ratio

The Advisor generally allocates between 30% and 60% of the Fund's net assets to the subadvisor for active management and between 40% and 70% of the Fund's net assets for passive management. Within these guidelines, the portfolio managers establish the fund's Current Optimal Ratio (COR). The COR is based on the advisor's proprietary and ongoing analysis for each investment category and may change over time.

Featured Investments

Active Component

C.S. McKee, LP

By actively managing a portfolio of statistically undervalued stocks with favorable earnings dynamics, and applying an internally derived bias towards value, C.S. McKee seeks to provide a return that surpasses client investment goals and benchmarks on a consistent basis. Risk on an individual security and sector basis is addressed through an analysis of such factors such as capitalization, credit, tax rates, option accounting, pension funding and thorough diversification among economic sectors.

Passive Component

The Vanguard Group

The Vanguard Value ETF (VTV) is designed to track the performance of the MSCI® US Prime Market Value Index, a broadly diversified index of value stocks of predominantly large U.S. companies. The fund attempts to replicate the target index by investing substantially all of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

Asset Allocation

US Equity : 97.10%
 Non-US Equity: 0.20%
 Cash : 2.70%

Fund Objective

The ActivePassive Large Cap Value Fund seeks long term capital appreciation.

Investment Strategy

The Fund invests at least 80% of its net assets directly in equity securities of large capitalization U.S. companies (those with market capitalizations between \$835 million and \$518 billion) and through other investment companies, such as mutual funds or exchange traded funds (ETFs), which invest primarily in those types of equity securities.

The Advisor has a contractual agreement to waive all fees through February 28, 2011 to ensure that the total net annual fund operating expense does not exceed the amounts set forth in the Prospectus.

Active component funded on 04/17/08. Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 1-877-APFUND-5. Class A performance reflects a 5.75% sales charge. Class A Load Waived performance does not reflect the 5.75% sales charge and if reflected, returns would be lower.

For recent performance updates, visit activepassivefunds.com or call 877-APFUND-5.

The fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The prospectus contains this and other important information about the investment company, and it may be obtained by calling 1-877-273-8635, or visiting www.activepassivefunds.com. Read it carefully before investing.

Fund holdings, sector weightings and asset allocations are subject to change at any time and are not recommendations to buy or sell any security. Mutual fund investing involves risk. Principal loss is possible. The fund is non-diversified, meaning that it may concentrate its assets in fewer individual holdings than a diversified fund. Therefore the fund is more exposed to individual stock volatility than a diversified fund. Investments in smaller companies involve additional risks such as limited liquidity and greater volatility. Investments in foreign securities involve greater volatility and political, economic and currency risks and difference in accounting methods. Investments in REIT securities involve risks such as declines in the value of real estate and increased susceptibility to adverse economic or regulatory developments. The fund will bear its share of the fees and expenses of the underlying funds. Shareholders will pay higher expenses than would be the case if making direct investments in the underlying ETFs. Because the fund invests in ETFs, it is subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of an ETF's shares may trade at a discount to its net asset value ("NAV"), an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact a fund's ability to sell its shares.

References to other funds should not be interpreted as an offer of these securities. The Russell 1000 Value Index measures the performance of those Russell 1000 companies with lower price-to-book ratios and lower forecasted growth values. The MSCI US Prime Market Value Index represents the value companies of the MSCI US Prime Market 750 Index. (The MSCI US Prime Market 750 Index represents the universe of large and medium capitalization companies in the US equity market.) You cannot invest directly in an index. Price to Book (P/B) Ratio compares a stock's market value to the value of total assets less total liabilities. The Price to Earnings (P/E) Ratio reflects the multiple of earnings at which a stock sells.

The sales load is waived for investors purchasing shares through the Advisor's wrap program. Speak with your Investment Advisor for more details. The ActivePassive Funds are distributed by Quasar Distributors, LLC.
